

## 2022 ETS® Proficiency Profile

### Summary of Scaled Scores

To show the ability of the group taking the test

**Faith Baptist Bible College**

**Standard**

**Test Description:** Combined

**Number of students tested:** 130

**Number of students included in these statistics:** 128

**Number of students excluded (see roster):** 2

**Cohort Name:** Combined

**Close Date:** Combined

**Student Level:** All Students

	Possible Range	Mean Score	95% Confidence Limits* for Mean	Standard Deviation	25th Percentile	50th Percentile	75th Percentile
<b>Total Score</b>	400 to 500	441.81	440 to 443	23.49	425	439	457
<b>Skills Subscores:</b>							
<b>Critical Thinking</b>	100 to 130	111.89	111 to 113	7.07	107	110	117
<b>Reading</b>	100 to 130	116.15	115 to 117	8.31	110	116	123
<b>Writing</b>	100 to 130	113.38	112 to 114	6.12	109	114	117
<b>Mathematics</b>	100 to 130	112.84	112 to 114	6.70	108	112	118
<b>Context-Based Subscores:</b>							
<b>Humanities</b>	100 to 130	114.68	114 to 116	7.43	108	114	120
<b>Social Sciences</b>	100 to 130	113.10	112 to 114	7.31	107	112	119
<b>Natural Sciences</b>	100 to 130	115.06	114 to 116	6.79	110	114	121

\*The confidence limits are based on the assumption that the questions contributing to each scaled score are a sample from a much larger set of possible questions that could have been used to measure those same skills. If the group of students taking the test is a sample from some larger population of students eligible to be tested, the confidence limits include both sampling of students and sampling of questions as factors that could cause the mean score to vary. The confidence limits indicate the precision of the mean score of the students actually tested, as an estimate of the "true population mean" - the mean score that would result if all the students in the population could somehow be tested with all possible questions. These confidence limits were computed by a procedure that has a 95 percent probability of producing upper and lower limits that will surround the true population mean. The population size used in the calculation of the confidence limits for the mean scores in this report is 128.

**Important Notice:** Statistics computed for small numbers of students (e.g., 25 or fewer) may not generalize to other, similar groups of students. The smaller the number of students included in the statistics, the less likely that another group of students would have performed similarly.
